Personal statement

I'm a full stack developer particularly interested in front end development. My thirst for knowledge brought me on a coding journey after careers in hospitality and caring, the skills I gained from these have given me the confidence to retrain for the tech world. I can work well under pressure and can adapt to new and challenging situations, I can work alone, or collaboratively as part of a team. I can work logically to achieve a set outcome and am able to problem solve. I am positive, ambitious and determined.

Technical skillset

Technologies: HTML • CSS • JavaScript • Python

Databases: Postgres • SQL

Frameworks: Bootstrap • jQuery • Django • Flask • React • Typescript • Tailwindcss

Version Control: Git • GitHub

Education

2021- 2022 Code institute- Diploma in Software Development

Remote based learning • Modern SaaS environment • University Accredited

2003-2005 Bradford college- GCSE Religious Studies grade A* • AS Religious Studies grade D

1995-1997 North Lindsey College - BTEC GNVQ advanced health and social care - credits for 7 units

1990-1995 High Ridge Comprehensive School – GCSE'S

English Language - C • English Literature - C • Information Systems (IT)- C • Mathematics - C • Geography - D

German – D • Dual Award Science – DD • Design and Technology - B

Projects

1. **Sick children's Trust** - For parents with that needed a place to stay whilst their child was in hospital.
Technologies Used - HTML, CSS • **GitHub** - <https://github.com/Mrst12/sick-childrens-trust-portfolio> • Live link <https://mrst12.github.io/sick-childrens-trust-portfolio/>
2. **Quizzical** – An Interactive Quiz.
Technologies Used – HTML, CSS, JavaScript • **GitHub** - <https://github.com/Mrst12/Quizzical> • Live link <https://mrst12.github.io/Quizzical/>
3. **Shop App** – A command line application for a shopping list
Technologies used – Python • **GitHub** - <https://github.com/Mrst12/shop-app> • Live link <https://shop-app-ne86.onrender.com>
4. **Step parents unite** – A blog website for step parents. **Technologies used** – HTML, CSS, JavaScript, Python, Django • **GitHub** - <https://github.com/Mrst12/step-parents-unite> • Live link <https://step-parents-unite.onrender.com>
5. **Appy-Families** – a full stack family planner application

Technologies used – HTML, CSS, JavaScript, Python, SQL, Postgres, React, Django • **GitHub** - <https://github.com/Mrst12/pp5-frontend-react-appy-families> • Live link <https://appy-families.onrender.com>

6. **Mister-T's UPVC** – A personal project done for my brother in laws UPVC company
Technologies used – HTML, CSS • **GitHub**- <https://github.com/Mrst12/mister-t-upvc> • Live link- <https://mrst12.github.io/mister-t-upvc/>
